**NATBIO**  
PUTTING NATURE FIRST

## ABOUT US

NATBIO's philosophy is "PUTTING NATURE FIRST". In line with this, NATBIO is trying to ensure the sustainability of civilized life without causing damage to nature. Our aim has always been to provide solutions which shall maintain a balance between the needs of the industry and the conservation of nature.

We are aware of the long-term benefits of such working method for our company, to the users of our products and for our business partners. We know that one of the most important conditions is to establish a balance between sustainability of industry without causing any adverse effect on the environment. We aim to provide top quality services by adopting as a principle, to supply not only the product but also the solution intended by such product.

## COMPETITIVE STRENGTH PROVIDED BY ADVANCED TECHNOLOGY & QUALITY PRODUCTS

We target to pioneer environmental and biotechnology applications. We provide natural alternative solutions which are not expensive to implement. We prioritize the use of domestic resources in our activities. We provide advanced technologies at affordable cost by supplying quality products developed innovatively using local resources. As a result we have been a company increasing the competitive strength of our business and that of our partners in their markets. However, we also provide products based on technologies and processes being used globally.

## PRODUCT RANGE

NATBIO is a driving force in delivering high-quality biochemicals for a broad range of applications. NATBIO products range from enzymes to customized solutions for industrial applications.

**OUR PRODUCT RANGE CONSISTS OF AN ARRAY OF BIO-PRODUCTS THAT HAVE BEEN DERIVED FROM NATURAL SOURCES AND MICROORGANISMS CULTIVATED BY NATURAL METHODS.**

Products that we offer are able to repeat the natural processes in the respective application area with superior performance. The ingredients other than biological components also consist of biodegradable substances or other substances that are naturally available.

## EXPERTISE & EXPERIENCE

NATBIO has built a reputation for technical expertise and application experience pushing the boundaries of quality and performance. A culture of continual innovation, flexibility and cooperation with academic and industrial research scientists means that NATBIO is able to meet more needs, complementing our enthusiasm for improvement.

## ENZYMES

“Enzymes are natural catalysts which speed up chemical reactions. Using enzymes is attractive because they are highly specific, efficient, and work under mild conditions. They can also be easily integrated into everyday industrial processes.”

This is particularly important in industrial applications, where it is imperative that “flexibility in product application” to adapt to the process. In this respect we excel, through our ability to deliver new solutions or to customize existing ones in order to meet specific customer requirements. NATBIO is the perfect partner.

## PRODUCT DEVELOPMENT

NATBIO has the required experience in developing innovative products for industrial enzyme applications. Our extensive product range has been built up based on the experience gained from hands on research and development projects with customers and research scientists.

This has resulted in an unrivalled ability to efficiently develop and commercialize new products, from cutting-edge bio-products to customized industrial solutions. Projects are continually ongoing to improve our current offering and to further expand our product range in related and new application areas, such as health and environment.

## SERVICE & SUPPORT

We pride ourselves on achieving long-term customer satisfaction through robust and reliable solutions and first-class service and support. This makes NATBIO a competent and efficient partner.

Key servicing issues are handled from our corporate headquarters in Bangalore, while comprehensive ongoing support is offered through our regional sales office as well as our highly trained, world-wide distributor network.

## BUSINESS OPPORTUNITIES

NATBIO strives to offer proactive support by co-operating closely with key companies and scientific / research institutes around the world, in order to keep our customers up to date on the very latest developments. We look at partnering and collaborating as an important strategic approach that will complement our growth in India and international markets. Our goal is to always keep you one step ahead.

## MARKETING PARTNERS

We are interested in marketing our products worldwide. If you have a relevant business, required product knowledge coupled with marketing experience and geographical knowledge, then we have a wide range of products to offer. We look forward to marketing our products in your country.

## PRINCIPAL PARTNERS

If you are based elsewhere in the globe, and have products to market in India, we seek to establish a long term and mutually rewarding relationship based on co-marketing or strategic alliance. We aim to build market for products that leverage our core strengths and complement our existing product portfolio.
